Production speed	3-5 m/min
Voltage	160 W
Supported film thickness	13 - 40 µ
Cushions	✓
Mats	✓
Pedal	-
Sensor	-

Please note that the BP2001 cannot process air cushions with a length of 1500 metres.

Luftkissenmaschine

activaAir® – BP2001 – LIGHT

Our air cushion machine combines modern design and high functionality like flexibility with a clean packing result. You can produce both air cushion chains and air cushion mats on the same air cushion machine. Depending on the material used, the production speed varies between 3 and 5 metres per minute. This air cushion machine is very well suited for online shops as well as small to medium sized businesses. With a low weight of only 4.5 kg, it is very dynamic and flexible to use.
