Air cushion

Due to the HDPE multilayer film used with over 50% recycled content, the stability and tear resistance of the air foil pillows is even better than that of standard commercial pillows of this thickness. Convince yourself of the activaTec[®] quality and save your customers from the annoying rummaging through conventional filling material made of Styrofoam or similar. Thanks to the transparent material, the goods are visible at first glance, which allows

Compatibility:

BP2000 – BP4000 – BP5000
